Coastal Douglas Fir Crossarms

South Caribbean Supplies is committed to producing the highest quality crossarms in the industry. Our products are available in any sizes and application that meet your spec. as well as all industry standards. Our reputation for manufacturing quality crossarms has been earned through years of working with utilities and industry associations to develop standards which meet or exceed the demands of the electric utility industry.

Our manufacturing facility is located on the southwest coast of British Columbia in the centre of the logging and milling industry, this provides direct access to the raw materials we need to purchase for the products we produce in our manufacturing facility. Our skilled staff is trained in timber and lumber grading at all levels, therefore we are able to maintain a multi-level quality control program. When you purchase crossarms from South Caribbean Supplies, you also gain the confidence of knowing our products are backed by years of experience and our commitment to provide the best products available in the industry.

Ordering Considerations:

Listed below are the considerations and information typically requested when ordering distribution crossarms.

1.Quantity

2.Cross Section and Length

3,Drilling Specifications

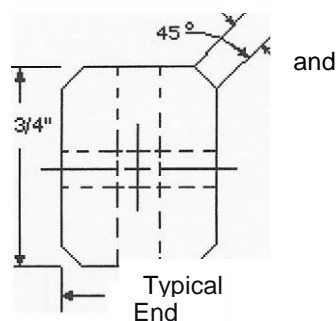

4,Wood Treatment (C.C.A. or Penta)

Our most common cross sections available for crossarms after seasoning surfacing are listed below.Any other sizes are available upon request.

1.

3-1/4" x 4-1/4"
3-1/2" x 4-1/2"
3-5/8" x 4-5/8"
3-3/4" x 4-3/4"
3-3/4" x 5-3/4"
4-1/8" x 5-1/8"
4-5/8" x 5-5/8"
4-3/4" x 5-3/4"

Crossarms are surfaced on all four sides. The top two corners have chamfered edges running the full length of the crossarm unless otherwise noted.

South Caribbean Supplies manufactures crossarms only from Coastal Douglas Fir solid sawn FOHC (Free of Heart Centre stock). Douglas fir material from other regions does not treat to required specification.

1. Manufacturing Specifications

South Caribbean Supplies will produce to any industry specification you require in any size of order. No order is to small.

2. Treating and Incising Specifications

All South Caribbean Supplies crossarms are incised unless specified. Treatment of all crossarms are done in a state-of-the-art facility ensuring proper penetration and retention to meet your specifications and industry standards. All crossarms are inspected post treatment to ensure the proper penetration and retention is achieved.

3. Inspection Requirements

South Caribbean Supplies crossarms are inspected multiple times throughout the production process for any defects therefore maintaining a high degree of Quality Control

4. Drilling Information

South Caribbean Supplies high-capacity precision drilling machines can meet any boring requirements. For information on how to specify drilling instructions, please refer to the following section.

Drilling Specifications

Important:

When ordering crossarms, be careful to specify exactly what is required. If a verbal or written description is questionable, send a descriptive sketch or drawing which details the requirement. Orders for custom manufactured crossarms are not subject to cancellation if production has started, nor may they be returned if a mistake is made in ordering.

It is suggested drilling instructions should be forwarded to us in the following manner(s):

- 1 Supply the applicable utility drawing or drawing number.
- 2 Reference a previous order.
- 3 Submit a sketch.
- 4 Call one of our knowledgeable staff for assistance.
